

Deciding on your Work Project Exercise

Deciding on the path you wish to follow for your Work Project can seem a challenging idea. We offer you here some questions that will help you in this process. Note that Nova SBE may not be able to offer a specific theme that you would like to work on. Thus it is better if you think about more than one option.

Answer the following questions:

1. What were your favourite courses?
2. Name preferred professors?
3. Are you majoring on a specific area?
4. Do you want to try an area for professional future?
5. What subjects interested you more in your courses or were lectured by a preferred professor?
6. What did you learn that you would like to explore more?
7. Do you prefer to do your work for the Work Project in a group, autonomously or in a company?

Now, gathering your answers, you will have at least one idea of a subject you would like to further investigate for your Work Project (being a theme that will be connected to your answers) – Check Work Project Presentation for more information.

If you have doubts, talk to professors that can work on those themes and make questions. And, always, follow your instinct. Good Luck!
